

TurnCheck™ Series-10

TurnCheck Series-10 systems are precision optical shaft measuring instruments designed for shop floor environments. Rugged and reliable, TurnCheck Series-10 has a completely telecentric, large field of view optical system that accommodates parts with shaft diameters up to 100 mm. The granite base support for rotary provides a rigid base and isolates vibration.

- **Measure Within Seconds –**
Shaft lengths up to 800 mm.
- **Collimated LED illumination –**
Reduces distortion to provide superior image quality and improved measurement of critical dimensions of all feature types.
- **Shop-Floor Debris Protection –**
Optics drop down below the stage when machine is not in use. Convenient air blow-off mounted to the front of the machine for cleaning parts prior to measurement.
